- Full support for geo-spatial geofencing and scheduling
- Subject's health and medical data can be logged
- User privacy settings
- SOS Alerts
- All signals and audio logged

BoldSafe Device

Lone Worker Protection

The Bold Locator Device is a highly featured and reliable way to provide effective protection for lone workers and other vulnerable persons. The device is compact, lightweight, discreet and very simple to use.

Fully integrated with the Bold Gemini monitoring platform, the device supports SOS alerts, two audio and man down features. It can be used across all sectors for protection and safety.

Help keeping you safe

Simple to operate and easy to use, the Locator device can be activated with a single button press, enabling the user to discreetly signal their position at the same time as opening a voice channel to the monitoring centre, which can then evaluate the situation. No special training is required in how to generate alerts, just a simple agreed protocol between the user and the monitoring services provider.

BoldSafe is an easy to use lone worker device, fully supported in the Gemini monitoring platform

BoldSafe Users

- Government and Local Authority
- Universities and Colleges
- Health Service Staff
- Business Travellers
- Transport & Logistics
- Facilities Management

BoldSafe

At the monitoring control room

The Gemini platform is instantly notified as soon as an alert is raised to enable a graded response to be made. The Bold software provides a fully BS5979 and BS8484 compliant software solution for receiving and handling activations.

The Bold Gemini platform can also be configured to provide a range of other integrated monitoring services, for example, fire, intruder, CCTV and access control alarm handling, all at a single operator workstation.

More Integrated Bold Modules

- **MultiView CCTV Platform**
- **Multi-Protocol Alarm Handling**
- **Gemini PC Web**
- **Social Alarm Monitoring**
- **Control Room Task Scheduler**
- **Telephony Integration**
- **Call Logging**
- **SMS Text Alert**
- **Engineer Smart Phone app**

BoldSafe is ruggedly constructed and available in a range of colours—black, blue, green and pink.
